

Please forward my voice of opposition to the FCC Proposal to ease media ownership rules to Michael Powell. The ownership restrictions attempt to promote diversification in airwaves and media, from political to musical forums. Easing the rules will promote media mergers and large conglomerates in control of media in the USA, and discourage if not eliminate the ability for alternate programming to compete or exist. The impact is a nation that is less able to contact its roots, as a melting pot, and be more dictated by a virtually centralized broadcast medium, not unlike state-run/state-controlled media. We need access to diverse programming and need to encourage such stations to exist, not to be run out of business or bought by large conglomerates!

Please support media that reflect our diverse nation and don't lift ownership restrictions!!
